## **New Registrant or General Midwife Wanted**

Our busy rural practice has about a 50% homebirth rate. We service many clients who are old order Mennonite and require home visits so be prepared for country driving, as well as modest dress. Our large catchment area is well covered by our large group of midwives. We have privileges at a level II hospital as well as local level 1 hospitals and have a supportive relationship for consultations. We have two office sites, you will work from both.

This is a growth position and you will be building caseload, but there will be some guarantees for caseload. You will be covering a planned leave for about 4 months of your time, so you must be available in the spring of 2012.

We are a primary care practice with generous time off (2-3 day weekends in 5 weeks) and continuing educational possibilities as well as two months off per year.

Our practice meetings are usually lively and interactive potluck lunches. We have excellent administrative staff to support your practice.
