

British Columbia – Cowichan Valley

Maternity Locum needed from November 2011 to October 2012:

Maternity Locum needed for approximately one year in the beautiful Cowichan Valley on Vancouver Island. Our catchment area extends from Ladysmith south to Mill Bay and west to Lake Cowichan/Youbou and includes the many quaint seaside villages throughout the region. It is also a locavore's delight, with many farms and markets nestled throughout the valley. There are also lakes and rivers, and many hiking trails providing all sorts of outdoor recreation opportunities.

We have privileges at the Cowichan District Hospital. It is a warm and welcoming work environment - we are well supported by our nurses, obstetric team and the family physicians in the area.

We are excited to have just recently moved into our new clinic location in a lovely old brick building that has just been completely renovated; it is spacious with high ceilings, plenty of light, and a very warm atmosphere. Our clinic is part of the new Matrea Centre in downtown Duncan; a new holistic women's centre, which also includes a yoga studio, prenatal classes, an acupuncturist, a naturopath, Indian head masseuse, counsellor and a small retail store (operated by the two midwives who dreamed this clinic to life).

There are four midwives working in two separate teams of two; each team of 2 working in a shared care model with her practice partner. We attend 30% of all births in the Cowichan Valley; and we also have an approximately 30% home birth rate.

All interested midwives can contact our clinic by phone or fax:
