

Temiskaming Midwifery Practice is a Northern Ontario, solo midwife practice. The practice is currently seeking a locum midwife to cover a maternity leave from March 2012 to November 2012. Any locum coverage during that time period would be much appreciated. The locum midwife would also be eligible for compensation from the AOM's Rural and Remote Locum Program.

The practice is located in Temiskaming Shores, ON and practice members would have hospital privileges at Temiskaming Hospital. Midwives at Temiskaming Hospital are very well supported by hospital staff(which are TAPA approved to act as second attendants) and work with full scope of practice. The practice also works with 2 second birth attendants for home and hospital births.

The community offers many recreational activities and is located on the shores of Lake Temiskaming. It is the perfect location to enjoy outdoor sports and activities.

The population of the community itself is about 10 500, however the practice's catchment area extends to Kirkland Lake, ON which no longer offers obstetrical services at it's hospital(1hr 15mins away from practice).
