General/New Registrant Position Available

Stratford Midwives is a growing practice serving a mixed urban/rural catchment area. Our clientele includes women from the Amish and Mennonite communities and our home birth rate is approximately 30%.

We are currently 4 full-time midwives practicing in a modified primary care model that ensures regular time off-call. We have privileges at the Stratford General Hospital and enjoy collegial relationships with the obstetricians and other health care providers in our community.

We would like to hire a 5th full-time midwife to begin work in early Summer 2010 and would be happy to consider either a general registrant or a new registrant for this position. (A new registrant position will be contingent on approval of funding in the new budget) This position has good potential to become a permanent one for the right candidate.

Please forward your resume by fax or email to the above address.
