

Midwifery Services of Haliburton-Bancroft

MSHB is looking for a **SECOND ATTENDANT** to provide care to women and families in a vast rural community.

MSHB has hospital privileges at Soldier's Memorial Hospital in Orillia, level 2, and is currently negotiating privileges at Haliburton Highlands Health Services in Haliburton; a level 1 facility. There is a plan to seek privileges at Peterborough Regional Health Centre in the near future.

The catchment area of this practice spans from Haliburton to Maynooth south to Apsley (including Bancroft) and then west again to Haliburton. Much of the area is on the edge of Algonquin Park and includes some of Ontario's most beautiful wilderness.

This is a hugely underserved area and women must travel great distances to give birth. This practice was developed in response to this unjust imbalance in resources available to rural women. Many women in this community face geographical barriers and no access to public transportation so a reliable vehicle and a desire to drive is essential in order to meet the needs of these women and their families.

If you are motivated and enthusiastic and feel passionate about a woman's right to give birth in her own community and are willing to work to provide women with that opportunity then I look forward to receiving your resume.

Rebecca Weeks-Toth, R.M.
